

Danish lifestyle magazine WOMAN SAID:

PureLime 0092 Support Bra TEST WINNER

Design: It's easy to put on and fastens with no less than seven hooks for support.

Comfort: The front fastening is a hit! You don't have to twist and turn your body or bend your arms out of their socket to put it on. Also, the option of regulating the straps makes it much easier to adjust exactly to your body and your needs.

Support: The testers love this bra, breast movement is minimised irrespective of size.

Moisture Management: Perfect! The moisture disappears into the bra and the body stays dry.

Best of all: It stays in place.

Conclusion: Can one fall in love with a bra? The test panel is very close to saying those three little words to this bra. With this bra you can concentrate on doing your sports activity instead of worrying about where your breasts are off to. Here is our favourite.
